

GIS Software Developer

The Omega Group is looking for an entry to mid-level ArcObjects developer to help create and maintain our desktop solutions as a part of our development team in San Diego. The Omega group creates industry-leading and innovative Geographic Information Systems (GIS) software designed to aid decision-making in law enforcement, public safety, and public education. These solutions are based on the latest technology from ESRI and Microsoft, enabling our clients to geographically analyze data more easily than ever before.

As a GIS Software Developer, your contributions to the development lifecycle will be in a collaborative team environment that values your input and abilities. This position offers career advancement, educational development opportunities, and affords you a chance to work with the latest and coolest technologies available.

Responsibilities

- Design, develop and maintain Omega desktop solutions
- Provide support on Omega products to implementation staff
- Perform software quality assurance testing on Omega products
- Write and review documentation on Omega products

Requirements

- Programming experience in C# or VB.NET with Visual Studio 2008
- Application development using ArcObjects
- Professional experience using ArcGIS desktop
- Degree in a GIS, Computer Science or related field
- Solid writing and communication skills
- Strong organizational skills.

Recommended Qualifications

- Database experience with SQL Server/SQL Express is beneficial
- Familiarity with Team Foundation System a plus

This full time position offers a comprehensive benefits package including medical insurance, dental insurance, life insurance, profit sharing, and a 401k plan. Please send your resume by to the email address **resume@theomegagroup.com** and refer to job number 170 in the email subject line.

The Omega Group is an Equal Opportunity Employer.
