

# IMPORTWIZARD™

**IMPORTWIZARD™** is the data integration tool that automates the flow of data from your reporting and dispatch systems directly to the mapping environment. Import Wizard enables the extraction of data from any records system using a database connection and is designed to output information into several GIS compatible formats.

### IMPORT WIZARD Advantages:

- **Automate** your entire data integration process from start to finish.
- **Visualize** current data directly from your records or dispatch system in a mapping environment.
- **Correct** invalid address entries through the use of numerous geographic validation tools.
- **Scrub** data for errors and combine fields on the fly for increased precision.
- **Locate** records accurately through the use of multiple address locators.
- **Connect** directly with any records or dispatch system through SQL queries or text files.
- **Save** significant staff time through the use of Import Wizard's automated tool set.
- **Focus** on making data driven decisions instead of processing data.

To learn more about how Import Wizard can help your agency improve data integration as well as automation please contact our sales staff toll free at (800)228-1059 or e-mail us at [sales@theomegagroup.com](mailto:sales@theomegagroup.com) for a remote demonstration.
