

SCHOOL PLANNER™

SCHOOL PLANNER™ allows facility planners and educational administrators to allocate resources more effectively thereby improving the quality of education for all students in your District. Student records are integrated with mapping tools that enable District staff to locate new facilities, project future enrollments, redraw existing boundaries and distribute staff members where they are needed most.

School Planner™ provides a simple user interface that enables the end user to produce detailed analyses, maps as well as reports with a minimum of training. The system can be used to support a boundary committee, make a presentation to the Board or perform extensive student demographic studies. Numerous school Districts throughout the United States have benefited from the use of School Planner™.

“Our district has been using School Planner for years and couldn't be more pleased with the result. This letter is to compliment the fine people at Omega and the excellent products and services they provide.”

Rick Buresh, Assistant Superintendent of Planning
Bismarck Public Schools, North Dakota

SCHOOL PLANNER ADVANTAGES:

- **Query** for students by any category such as grade and/or school of attendance for the entire District, within a boundary, near an address or near neighborhood landmarks.
- **Determine** where multiple students reside at the same address with graduated symbol mapping and associated student concentration reports.
- **Study** the locations of students by factors such as special education or free and reduced lunch so that programs can be located where they are most needed.
- **Produce** a five-year enrollment forecast for any school based on historical data and optional housing layers.
- **Create** district wide optimized boundary scenarios based on school capacities using both an automated as well as a manual routine.

To learn more about how School Planner can help your district address facility planning needs and demographics contact our sales staff toll free at (800)228-1059 or e-mail us at sales@theomegagroup.com for a remote demonstration.
