Gulfport Police Launch CrimeView

March 7, 2008

Gulfport, Mississippi was essentially ground zero when Hurricane Katrina made landfall in August of 2005. The eye of the storm passed within miles of the city center. The devastation left behind was extensive.

As part of the overall push to rebuild the community, Gulfport Police Department recently implemented CrimeView. Through the efforts of The Omega Group, law enforcement staff now have another tool at their disposal in the fight against crime. CrimeView helps maximize limited resources by allowing command staff to place officers at the right place at the right time.

Hurricane Katrina Approaching the Gulf Coast

The desktop mapping application utilizes numerous data layers such as calls for service, incidents, warrants and field interviews. Command staff are notified twice per day regarding recent activity through CrimeView's Threshold Alert routine. Detailed crime analysis maps and reports for any geographic area in Gulfport can now be created in minutes.

"The professionalism and timely service we have received has truly been a rare occurrence for our agency when dealing with software implementation."

Allan Weatherford, Police Chief, Gulfport Police Department, Mississippi
