

# OMEGA Press Release

July 15, 2008

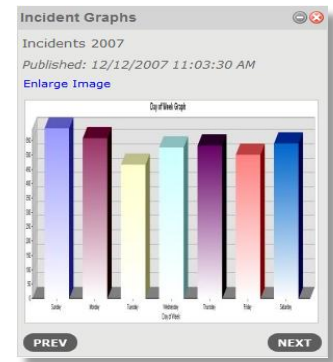

## Wilson Fire Launches OMEGA DASHBOARD™

In an effort to allocate resources as effectively and efficiently as possible Wilson Fire & Rescue in North Carolina recently launched Omega Dashboard. The solution, which resides on an ESRI mapping platform, allows anyone to access end resultant maps and reports through a Web browser. No knowledge of GIS is required in order to decipher current information about calls-for-service in the Wilson area through the use of Omega Dashboard.

Omega Dashboard allows the end user to display data from multiple "Content Libraries" which contain maps, reports and charts. This way each user can customize their own interface and view only information that pertains to their area of interest. A common operating picture is

established through an automated data import process as well as consistent content made available to anyone with login permissions.

Wilson Fire & Rescue command staff now have another tool at their disposal in dealing with day-to-day operations as well as large scale emergency events. Omega Dashboard will continue to evolve as the department's needs do.

Report Bank

Name	Description
Incident Summary 2007	Summary of incidents in 2007; Published: 12/12/2007 10:57:54 AM
Arsons 2007	Detailed report on arsons in 2007; Published: 12/11/2007 8:57:29 PM
