San Diego, CA 92121

The Omega Group,

I would like to take this opportunity to thank The Omega Group for creating a product that has made completing my responsibilities as the division demographer easier, more accurate, and less stressful. The SchoolPlanner application has streamlined my planning duties and has proven invaluable in this era of data driven decision making. Software updates and enhancements continue to make the product better and more productive.

I have been completely satisfied with the SchoolPlanner software. It has been in use in my division for nearly a decade now and has proved very useful in planning redistricting initiatives, locating new school sites, and assisting in producing very accurate student membership projections. In fact, my student membership projections have been within 1% of actual membership for 7 out of the last 8 years.

I would also like to commend the great group of people at The Omega Group for providing exceptional customer service, a quality that is often overlooked in many organizations. I would especially like to recognize my project manager, Lee Anna Munizza, who works with me and my staff to provide a turnkey application that is immediately productive. She meets our tight deadlines, answers any questions we might have, and is always available to troubleshoot and remedy any problems we might encounter with a pleasant and positive attitude.

Thanks and keep up the good work!

Sincerely,

Donald E. Greer  
Demographer/GIS Manager  
Virginia Beach City Public Schools
